At Rexel, our Energy Solutions teams’ top priority is providing you with the right solutions, products and expertise to successfully meet and exceed the expectations of your clients and customers. We’ve built an exclusive team of seasoned electrical professionals who work tirelessly to ensure that you have the information, services and products you need when and where you need them — every time.

We’re not a manufacturer and we do not sell consulting services. Our goal is to become an extension of your business and provide you with a single point of access to a world of solutions.

The People You Know with the Power to Deliver™

Energy Solution Specialists — Working for you

Technical Expertise — Industry-leading technical and logistical solutions

Anywhere You Are — Locations in your backyard and nationwide

Flawless Execution — From planning to sourcing to arranging installation we’re here to help

We Have Answers

Whether you’re an electrical contractor working for a client or a facilities manager working for your boss, you’re going to get a lot of questions: What products are appropriate? How will they affect operations? Which facility should we tackle first? How will the products be delivered? How will we pay for it? How long will it take?

Rexel’s dedicated Energy Solutions Team is standing by to help.

First, We Spell Out Your Options. You will get good, better and best recommendations at various price points with energy savings calculations based on the real-world data from your facility. Because we are not a manufacturer, you will get unbiased recommendations tailored to your unique environments and budget. No pressure, just smartly coordinated product solutions and advice to fit your goals and objectives.

Second, We Help You Plan. From assistance with financing to logistics, installation to recycling, we leave nothing to chance. We’ll help prioritize and stage your installation to get the best bang for your buck with minimal disruption to operations.

Third, We Stick By You… With project management services to ensure flawless execution and beyond for warranty management, service and support — no matter where your work takes you — we’re The People You Know with the Power to Deliver™.

✓ Part of an elite team within Rexel Inc. dedicated to serving Rexel customers by crafting solutions to meet their unique needs

Start Here. Call 1-888-RexelPRO
Realistic Solutions for Your Business

The faster you get started, the more money you will save. It’s clear, our Energy Solutions Team can save you substantial sums of money over the long haul. But did you know that many of our projects pay for themselves in less than a year?

That’s because when you work with us, you get far more than an energy audit and “savings guesstimates.” We carefully analyze each facet of your operation to understand your exact situation and needs. Are you a building owner? Short- or long-term lessee? What are your financial goals? Rexel creates solutions tailored to the realities of your specific business and geography.

Gain Every Possible Advantage. We maximize your tax deductions, manufacturer rebates and available incentives to create an optimal solution with the shortest possible payback period. We’re local, so we know what is available from your utilities and governments. We provide the solutions and certifications necessary to take advantage of every opportunity — and there are some GREAT opportunities waiting for you — but they won’t last forever.

Get The Fastest Possible Payback On Your Project. We have the local resources and expertise to handle all of the complicated legwork involved in calculating your payback period. You get the immediate benefit of a better, safer and more efficient workplace coupled with enormous energy savings that will be realized for years to come.

Examples:

- 250,000 square-foot warehouse for a complete relighting
  - Cost of Project: ($140,000)
  - EPAct benefits: $140,000
  - Abandonment: $90,000
  - Annual Energy Savings: $60,000
  - Year One Benefit: $230,000
  - “This project was cash-flow positive in a big way for us. We’ve decided to retrofit all five of our properties in 2012 rather than one per year!”

- Independent school district — 25-watt lamp & ballast retrofit
  - Cost of Project: ($119,000)
  - Utility Rebate: $344,000
  - Energy Savings: $497,636
  - Annual Maintenance Savings: $428,000
  - Year One Benefit: $469,636
  - “Where else can a school district get this kind of return on our investment? Plus we have brighter, higher quality light in the classroom.”

It Adds Up Fast:

- We leave no stone unturned to ensure you achieve maximum benefits and the fastest financial return on your energy efficiency investment.
- Energy Savings — in kilowatt hours saved and dollars saved.
- Maintenance Savings — eliminating annual relamping costs, leveraging long-life products and OEM extended warranties.
- Utility Rebates — we’re local. We understand what is available to you and how to qualify for the maximum benefit.

Federal Tax Savings:

- EPAct — We provide third-party certification of your energy savings so you may be able to capitalize on up to $.60 per square foot in federal tax deductions.
- Abandonment — We help you calculate the value of your old assets (like light fixtures) and provide the documentation necessary to claim the tax deductions.
- Properly Categorize Your New Assets — certain specific location lighting may qualify for faster depreciation as IRS category 1245 assets. The benefits can be significant.
- Energy Star Programs — using Energy Star rated technology and earning Energy Star Certification can earn you additional rebates and save you even more in energy costs.

Energy Savings, Maintenance, Rebates, Tax Savings

Now More Than Ever — Time is Money. Using outdated technology is like burning piles of cash. It uses too much electricity, too much maintenance and requires frequent replacement. The faster you switch, the more money you will save not only in energy costs but also in durability. Plus, the utility and tax incentives will not last forever. Many expire this year.

The Cost of Doing Nothing. Every year, the average business is likely consuming at least 20% more energy than it would with energy efficient technology. In many cases, this amounts hundreds of thousands of dollars. Plus, utility and tax incentives to upgrade will soon expire.

Call Our Energy Solutions Team Today to Get Started: 1-888-RexelPRO
We Do Our Homework.
We carefully select and recommend only the best products from top manufacturers in every electrical product group by forging direct relationships with manufacturers. We do this to gain a deeper understanding of their product capabilities and applications in real world settings. By constantly evaluating new products and emerging technologies, we become an invaluable source of unbiased advice for our customers. Curious about a new technology? Give us a call, we’ll share our experiences and help you make an informed decision.

We’re Local. And We’re Global.
Chances are, there is a Rexel location close by that can be your single point of contact for a whole world of solutions delivered anywhere in the U.S., usually overnight. Every Energy Solutions Team member has the entire Rexel network of locations, inventory and expertise at his or her fingertips, ready to be mobilized at your request. So no matter how big your project is, or how many locations you serve, our Energy Solutions Team gives you the power to deliver with confidence.

Not Just Products — Real Solutions.
Yes, we have the largest inventory of in-stock products available that can be delivered nearly anywhere in the U.S. overnight. But the devil is in the details: from basic kitting and cutting services and on-hand inventory support systems to centrally managed energy efficiency monitoring and control systems, just ask your Energy Solutions Team member. It’s likely we’ll find a better, more cost-effective way to run your facility, manage your business, serve your customers and save money in the process. That’s our power to deliver.
